                                                                                                                                                                                                                                                                                                                                                                                                                                  clodin family of tight junction (TJ)-constituting membrane protein. The membrane protein can be used in medical field. This sequence represents the clodin 3 protein described in the method of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Tight junction-constituting membrane protein clodin family - useful in the medical field % \left( 1\right) =\left( 1\right) +\left(                                                                                                                                                                                                                                                                                                                                                            Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         This invention describes novel murine nucleic acid sequences encoding the clodin family of tight junction (TJ)-constituting membrane protein. **Tsolation and amino acid sequence of two urotensin II peptides from Catostomus commersoni urophyses.";

Peptides 4:367-373(1983).

-i- FUNCTION: UROTENSIN IS FOUND IN THE TELEOST CAUDAL NEUROSECRETOR: SYSTEM. IT HAS A SUGGESTED ROLE IN OSMOREGULATION AND AS A CORTICOTROPIN-RELEASING FACTOR.

-I- SIMILARITY: BELONGS TO THE UROTENSIN 2 FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    -i- PTM: PHOSPHORYLATED (BY SIMILARITY).

Proc. Natl. Acad. Sci. U.S.A. 77:5021-5024(1980).

-I- FUNCTION: UROTENSIN IS FOUND IN THE TELEOST CAUDAL NEUROSECRETORY
SYSTEM. IT HAS A SUGGESTED ROLE IN OSMOREGULATION AND AS A
CORTICOTROPIN-RELEASING FACTOR.
-I- SIMILARITY: BELONGS TO THE UROTENSIN 2 FAMILY.

"Alpha-conotoxin AulB selectively blocks alpha3 beta4 nicotinic
"Alpha-conotoxin AulB selectively blocks alpha3 beta4 nicotinic
acetylcholine receptors and nicotine-evoked norepinephrine release.";
J. Neurosci. 18:8571-8579(1998).

-i- FUNCTION: ALPHA-CONOTOXINS ACT ON POSTSYNAPTIC MEMBRANES, THEY
BIND TO THE NICOTINIC ACETYLCHOLINE RECEPTORS (NACHR) AND THUS
INHIBIT THEM. THIS PEPTIDE BLOCKS MAMMALIAN NICOTINIC
ACETYLCHOLINE RECEPTORS COMPOSED OF ALPHA-3/BETA-4 SUBUNITS.
-i- MASS SPECTROMETRY: MW=1572.5; METHOD=ELECTROSPRAY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ALPHA-CONOTOXIN AUIB.
